7% LARGER SWEET SPOT

ISOMETRIC™

CONVENTIONAL  
ROUND FRAME

## SIGNATURE YONEX TECHNOLOGY

ISOMETRIC™ technology continues to help the world's greatest players achieve global success.

Developed over 30 years ago, the ISOMETRIC™ design increases the sweet spot by 7%\*. Compared to a conventional round frame, a square-shaped ISOMETRIC™ racquet generates a larger sweet spot by optimizing the intersection of the main and cross strings.

ISOMETRIC™ delivers greater control without sacrificing power.

ISOMETRIC™ is a Trademark of Yonex CO., LTD.

\*Tested by Yonex.

## VCORE DUEL G BALL CRUSHING TECHNOLOGY

### LOCK BOOSTER SYSTEM

This unique grommet system features additional holes at the top of the frame, as well as grooves that lock the string in place, allowing you to crush the ball and produce more spin.

Patent Pending

### TOUGH G FIBER

Three times more flexible than CARBON NANOTUBE, TOUGH G FIBER is incorporated into the shaft for high repulsion and a heavier, more powerful spin.

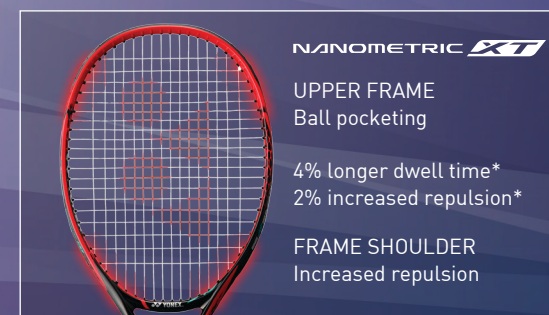

## VCORE SV (SPIN VORTEX) SPIN IT TO THE LIMIT

### NEW AERO FIN

Enhanced Aero Fin technology gives you more spin and power. New fins at the top of the inner and outer frame decrease air resistance by 16%\* for faster swing speeds.

**ANGELIQUE KERBER**  
2016 World No.1

### SV FRAME

The first frame with NANOMETRIC XT carbon graphite, the SV Frame holds the ball longer while maximizing repulsion at impact. The Aero shaped frame shoulder increases flex and provides extra torque.

**NANOMETRIC XT**

# STRING TECHNOLOGY

Developed from innovative technology and unmatched industry knowledge, Yonex is the go-to string for many tour players who count on premium string quality to elevate their performance.

## SIF TECHNOLOGY

The world's first string technology that infuses polyester with Silicone oil, allowing for better string movement at the point of contact. Yonex's Silicon oil Infused Filament (SIF) Technology greatly reduces friction between strings along with a swift recovery of the string bed that increases ball speed and spin.

SNAPBACK SPEED  
INCREASED

SIF Technology is developed in cooperation with NANODAX.

## POLYTOUR AIR TECHNOLOGY

Enjoy the control and durability of a polyester string that's soft, plush and easier on the arm.

POLYTOUR AIR incorporates HR-Elastomer, a soft polyester that allows the string to bend and return to its original shape, achieving both increased shock absorption and repulsion.

## MATERIAL COMPARISON

Reduce shock by **20%** Flexibility up **1%**

Compared to conventional model. Tested by Yonex.

# FOOTWEAR TECHNOLOGY

All Yonex footwear is equipped with POWER CUSHION Technology, which absorbs shock and smoothly reverses the impact energy into your next movement. Gentle yet durable, a raw egg can be dropped from seven meters above a POWER CUSHION mat, rebounding to a height of four meters without breaking.

## 3-LAYER POWER CUSHION

For faster and lighter footwork on and off the court, Yonex's 3-LAYER POWER CUSHION absorbs 30% more shock than the original. Constructed with three different layers, the firm outer layers provide enhanced energy transfer, while the softer inner layer absorbs the shock load and quickly returns to its original shape.
